Moisture Absorber Ideal for electrical and instrument enclosures!

The E-333 provides dampness protection that is ideal for small spaces such as instrument and electrical enclosures. This eco-friendly dehumidifier silently and reliably protects electrical and electronic components from moisture, hence corrosion damage. The unit lasts 20-30 days before renewing. Special features of the E-333 includes: the unit works in areas up to 333 cubic feet, requires no batteries or cords for use, is 100% renewable, works up to ten years, is compact/silent, always spill and mess free and is non-toxic, child and pet safe! Great for many uses besides electrical/control enclosures- try it around the home as well! Plug-in for 10-12 hours to rejuvenate.
